INDIGO SNAPS UP MILTON KEYNES CAR PARK

Indigo, the global leader in parking, has acquired from Network Rail this multi-storey car park (MSCP), close to Milton Keynes Central Railway Station.

The six floor, multi-storey car park contains 294 spaces and features disabled parking bays and electric charging points. Open 24/7, the car park has security for its customers, which includes access via a CCTV monitored entrance which requires an entry code. Monitored remotely, customers can contact Indigo's 24/7 Customer Support Centre for any enquiries via the communication points situated on each level of the car park, the parking machines located on the ground floor, plus at the entry and exit barrier equipment. Customers can now purchase season tickets online via Indigo UK's new website uk.parkindigo.com

The car park, which is located close to the Milton Keynes railway station and one of the main lines from London to Manchester, serves as a crucial point for commuters and business users across Milton Keynes.

Phillip Herring, Managing Director, Indigo UK, said "We're excited to have acquired the MSCP from Network Rail and look forward to providing a seamless parking experience for our customers. We provide safe secure and competitively priced parking and this acquisition strengthens Indigo's portfolio.

"Customer experience is crucial to the future of town centre and railway parking. We are constantly looking for ways to improve services for our customers and we will continue to invest in this area."
